

## Recycling & Waste Management

### ENVIRONMENTAL POLICY – STATEMENT

The Directors of the company will pursue a policy designed to limit the effects upon the environment of their operations by:-

The use of modern fuel efficient vehicles which will be maintained in such a manner that the maximum thermal efficiency is extracted during their lifetime.

Monitoring noise levels emitted by vehicles and their associated accessories, fixed machinery, alarms etc. In order that minimum auditory interference is experienced by staff and the general public.

Ensuring that any odours emitted are kept to a minimum by employing a effective cleansing programme and ensuring waste is dealt with in an expeditious manner.

Planning road vehicle running distances in such a manner that unnecessary journeys are eliminated.

The minimum use of electric power, where energy has to be consumed and limiting wattage by the use of energy efficient lighting. Motor speed control equipment and power-factor correction control.

Ensuring employees will be guided in the use of equipment which may give rise to spillages of liquid, or the production of litter, in such a manner that these are eliminated, or where this not possible, immediate cleansing is implemented; the provision of appropriate means of achieving this later will be provided.

By the appointment of an officer with responsibility for the above matters.

A programme of monitoring the visual impact of operations, vehicle cleanliness, external appearance of works areas and yard etc.
